

What sets ProGlider Boats HyperGlider™ apart from others?

- Courteous customer support.
- Unibody construction (no bolt on pontoons or motor mounts).
- Absolutely no use of any wood materials in construction.
- Propellers cannot inadvertently cut hulls when motor is tilted up and turned.
- Flat walking surfaces incorporating non-slip molded directly into fiberglass with optional SeaDek® on main deck.
- Only the very best saltwater rated hardware and materials are used to prevent corrosion.
- Powder-coated 2" aluminum lighting & Bimini arch.
- Comfortable shock mounted bucket seats.
- Passenger handholds.
- Drier ride due to increased freeboard, higher seating position and patent pending hull design.
- Drier ride due to completely sealed footwells.
- Drier ride due to one-piece polycarbonate splash shield.
- Simple one-piece Sunbrella® Bimini that doesn't interfere with operation of shift/throttle control when open.
- Larger group 24 starting battery.
- Main power shut off switch preventing battery drain when not in use.
- Completely sealed steering mechanism in center console.
- Heavy duty continuous rub rail.
- Unobstructed navigation lights.
- Ability to walk anywhere on boat without capsizing, extreme stability.
- Walkable gull wing design for access to aft sections of boat.
- 5/5/1 Fully transferrable warranty.
- Stainless-Steel pop-up cleats vs plastic.
- 360° Bluetooth speaker sound system.
- Full fiberglass sandwich construction using the best closed cell foams, glass fabrics, and vacuum infusion technology available.
- Carbon fiber reinforced fiberglass where required.
- Dialed-in stainless steel propeller for top performance.
- General overall robustness.
- Fits in standard 7' high x 20' deep double garage when on trailer.
- Aluminum torsion axle trailer to prevent rusting.
- Did we mention courteous customer support? 😊
